Data Analyst

Motivated **Data Analyst** with a background in architecture, engineering, and design, combining strong analytical thinking with creativity and attention to detail. Skilled in transforming complex data into clear insights through **SQL, Python, Excel/Google Sheets, and Tableau**. Experienced in data cleaning, visualization, and building dashboards that support decision-making. Known for problem-solving, process improvement, and knowledge sharing with teammates. Adaptable, fast learner, and passionate about turning data into actionable solutions.

PROJECT EXPERIENCE

E-commerce Performance & Delivery Insights (<https://tinyurl.com/tableauDeliveryPerformance>)

Tools: SQL, Tableau, Google Sheets

Description: Conducted sales and delivery performance analysis to identify revenue trends, conversion rates, and logistics bottlenecks. Designed interactive dashboards to visualize KPIs and customer behavior patterns.

My tasks: Data cleaning and transformation, SQL query building, dashboard creation, advanced visualization techniques, and presentation of business insights.

Result: Provided actionable recommendations to improve delivery efficiency, increase conversion, and support management decisions with clear data storytelling.

Apartments Manager for Income & Expense Tracking (<https://tinyurl.com/Apartments-Manager>)

Tools: Google Sheets, Google Apps Script (JavaScript), SQL-like queries

Description: Built a customized financial tracking system in Google Sheets to manage daily income, expenses, debts, and profitability for apartment rental business. Designed a structured schema with dedicated columns for revenue, expenses, debt repayment, and summaries, ensuring clear and scalable data organization.

My tasks: Automated calculations and summaries (total revenue, expenses, profit, idle days), integrated conditional logic for status tracking, and implemented automation of maid's debt and repayments using Google Apps Script. Continuously enhanced the system with new features and refinements, including improved reporting and automation logic.

Result: Reduced manual work, improved accuracy of financial tracking, and provided a transparent system for better business decision-making.

PROFESSIONAL EXPERIENCE

Spatial Data Designer | InsideMaps Inc | Dnipro, Dnipropetrovsk, Ukraine

Feb 2022–December 2022

- Produced 3D visualizations and 2D floor plans from panoramic imagery, aligned with real-world measurements.
- Improved workflows to accelerate delivery and enhance quality of spatial data.
- Assisted new colleagues with onboarding, explaining tools and technologies to speed up their adaptation.
- Performed detailed self-reviews to identify and fix inconsistencies.
- Collaborated with peers to meet deadlines while maintaining client standards

EDUCATION

IT School GoIT | Ukraine
